

# Public opinion on teaching excellence

In January 2014, the ATA contracted Environics Research Group to conduct a scientific opinion poll of a randomly selected and representative sample of Albertans on issues of teacher excellence as well as an environmental scan of publicly available data. Here's what was found.

## teaching excellence

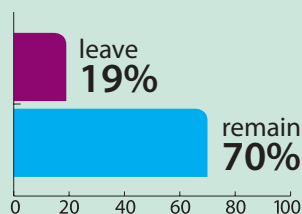

Are Albertans satisfied with the quality of teaching at their schools?

(Alberta Education satisfaction surveys, 2013)

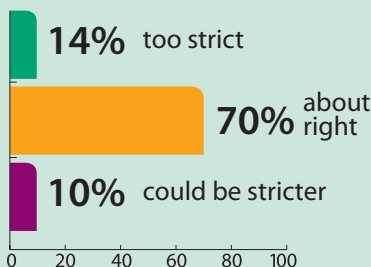

## on principals

Should principals remain part of the ATA?

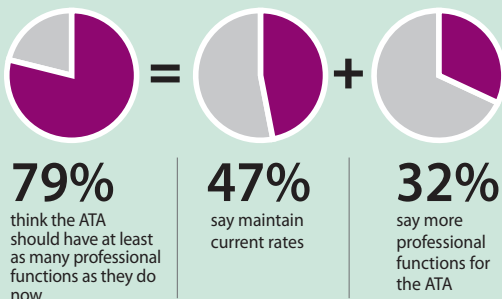

## teacher certification

Are current requirements regarding who is authorised to teach appropriate?

## ATA's professional functions

The Environics January 2014 report shows the findings of a telephone survey conducted among 806 adult Albertans interviewed during the period from January 13–24, 2014. The margin of error is plus or minus 3.4 percentage points, 19 times out of 20. The complete findings can be read at [bit.ly/st8v7b](http://bit.ly/st8v7b)
